\* \* \* AN ILLUMINATED MANUSCRIPT OF THE LATE PERIOD OF THE ITALIAN RENAISSANCE WITH SOME OLDER BORDERS BY A FLEMISH ARTIST. ALL THE DETAILS SHOW THAT THIS MANUSCRIPT WAS EXECUTED FOR A MEMBER OF THE MEDICI FAMILY, and it is suggested from the Coat-of-Arms of Imperial Austria, occurring in one of the borders, that it was done in Florence for the Duchess Joanna, the first wife of Francesco Maria de Medicis Second Grand Duke of Tuscany, and daughter of the Emperor Ferdinand I. It probably afterwards was in the possession of Marie de Medicis, wife of K. Henri IV. It came later from the collection of the Prince de Conty, when it was valued at 2500 livres.

\* \* AN INTERESTING MS. WITH MINIATURES OF UNUSUAL SIZE, DESIGN, TREATMENT AND COLOURING. From the legend "A TOUS ACCORDS" on the scroll borne by the angel below the miniature of the Presentation in the Temple, the MS. would seem to have been executed for an ancestor of Tabourot, the author of the "*Bigarrures et Touches du Seigneur des Accords*." The Calendar for January bears the inscriptions "*A tous Accords. A moy Tabourot 1606*," and at the end are three pages of Birth Entries of the Bernard-Tabourot family from 1606 to 1645.

\* \* \* These verses were probably written about 1776, when Mme. Elizabeth was about ten years old; they were no doubt learnt off by heart and written down phonetically. We transcribe them as written, and give a copy in more normal spelling; it will be noticed that in the original the verses are not indicated:

- 310 AMERICA AND FRANCE, 1796. Long and important A. L. s. 4 pp. folio, on the official paper of the French Republic, *St. Ildefonse*, 1796, from the Citizen Mangourit, who apparently wished to be appointed Chargé d'Affaires in America, to the French Directory, explaining the actual status of France at the time in the U.S., and asking for instructions and a line of policy to pursue. He states that the attitude of the Government of Louis XVI was a failure, and that what the English had lost by arms they had regained by commerce, that Washington was always very undecided in his attitude towards France until after the success of the Revolutionary armies:

Si Jefferson ou le Général Clinton sont élus, la politique redeviendra française. Jefferson est républicain par sentiment et par esprit, Clinton l'est par principes et par habitude. Si John Adams est nommé, attendons-nous à plus de politique avec nous, etc.

316 BALLADS. *The following XVIIth and early XVIIIth Century Ballads are written by various hands on sheets of paper; some at least, judging from corrections which have been made, appear to be original compositions:*

Ballad headed "A new Ballad to ye Tune of ye Black Smith."

Commences:

Since Monarchs were Monarchs it never was known  
That so Little Power belong'd to a Clowne,  
Or yt made by a Mob they may so be puld down,  
Which no Body dares deny.

The ballad consists of 21 verses, and is written on two sides of a folio sheet; one verse refers to Sir Christopher Wren:

To worke in a hurry Sir Christopher falls,  
And fetches his Men and his Boards from St. Paul's;  
I'm glad at my heart they pass'd clear by White Hall,  
Which no Body . . . .

\* \* Evidently written in Queen Anne's reign.

Ballad headed "From W. T. in ye Marshelsea to C. W. in Newgate." Tune "To all ye Ladies." First verse:

From me Dear Charles, inspired with Ale,  
To thee this letter comes,  
To try if scribbling can prevail  
To Moderate our Dooms;  
Tho pent in cage, the Black-Bird swings,  
Yet still he hops and struts and sings, with a fa-la-la, etc.

\* \* Nine verses on two 4to leaves.

Ballad headed "The Tryall and Sentance of Poland." Commences:

How does it conflict with ye Oath of Allegiance  
To punish ye Teacher of Passive Obedience,

Ends:

And Tamely Permitted ye K——gs Decollation  
As now this Combustion and Late Toleration.

\* \* Thirty-six lines on one side of a folio sheet.

The Deevell is in Dun Kirke.

says "it was copied on the fly-leaf of a book, published a few years before the expulsion of the actors from London into the Liberties." This expulsion took place in 1575, and it will be noticed that this book is dated the following year. Fleay ("History of the Stage," 1890, p. 49) reprints the verses, and discusses the question whether the ballad is genuine or forged by Collier, deciding that it is genuine. According to Collier, Wilson is mentioned in the licence to Lord Leicester's players; and Jack Lane may be either a different performer, or John Laneham, with his name abridged for the sake of the rhyme.

- \* \* \* On the reverse page is a very appreciative and favourable report justifying his appointment as Collector of Customs, signed by his superior, Mr. John Mitchell, 1791. Referred to and described on page 141 in the January, 1912, number of the "Burns Chronicle and Club Directory."

## The Property of the United Kingdom Alliance.

- 394 BURNS (Robert) To Mr. Graham of Fintry, requesting a favour, AUTO. VERSES, 97 lines, on 3½ pp. folio, dated 1788, A FINE MANUSCRIPT, AND IN GOOD CONDITION

- \* \* \* It is interesting to note that the date of this manuscript confirms the conjecture of Messrs. Henley and Henderson that this poem is the one Burns refers to in a note to Miss Chalmers, of Sep. 16, 1788, as being "in the manner of Pope's *Moral Epistles*. It is only a short essay, just to try the strength of my Muse's pinion in that way." It begins :

When Nature her great masterpiece designed,  
And framed her last best work—the Human Mind;  
Her eye intent on all the mazy plan,  
She formed of various parts the various man.—

In the opening lines, and throughout the poem, there are slight differences from the printed version; at the end is a signed inscription by J. G. Burns, the poet's son, to the effect that the manuscript was presented to Dr. McCulloch, Feb. 21, 1838; by him it was given to the U. K. Alliance in 1856, to be sold at a bazaar held in that year for the benefit of their funds. It remained unsold, however, and has ever since been kept in the office of the U. K. A. either in Manchester or London. A typed extract from the Alliance Weekly News of Feb. 16, 1856, containing a copy of Dr. McCulloch's letter presenting the manuscript, accompanies the lot.

- 395 BURNS (R.) AUTO. VERSES, 22 lines on 1 p. folio, headed "To Miss Jenny Cruikshank," written in the blank leaf of a Song book, *laid down, very slightly defective at one of the joints*

\* \* \* These verses, which were first published in the Edinburgh edition of 1793, were addressed to the daughter of the poet's friend, Mr. William Cruikshank, of the High School, Edinburgh. The first two lines read in the manuscript:

Beauteous rosebud, young & gay,  
Blooming on the early day.

The second line is now printed:

Blooming on thy early May.

Another manuscript of this poem, the property of the late George Seton Veitch, Esq. was sold in these rooms on July 26, 1910. It is thought that this manuscript was presented to the U. K. Alliance by Dr. McCulloch at the same time as the preceding lot.

\* \* \* THE FIRST EDINBURGH EDITION, and a copy of the issue which has the word *skinking* on p. 263. Some bibliographers say that this is the second issue; but Messrs. Henley & Henderson believed that it was earlier than the "*stinking*" reading, and therefore the first issue of this edition. On the title-page of this copy is written the name of a former owner, Ad. Rolland, which has been shaved by the binder.

- 398 [BURNS (R.)]. Young (Edward) The Complaint, or, Night-Thoughts on Life, Death, and Immortality, *original calf*

\* \* \* PRESENTATION COPY FROM ROBERT BURNS, with autograph inscription on the fly-leaf: "To Mrs. McIlhose (*sic*) this Poem, the sentiments of the heirs of immortality, told in the

numbers of Paradise, is respectfully presented by Rob<sup>t</sup> Burns." Beneath this the recipient has written "Mrs. M<sup>c</sup>Lehose presents this Book to Mr. Calpatrick Sharp (*sic*) as a small return for all his kindness." On another page Mr. Sharpe has written "on the 2<sup>d</sup> of Oct<sup>r</sup> 1839 Mrs. M. sent me this book. C. K. S." It is unnecessary to dilate on the extraordinary interest of this volume, presented by Burns to his Clarinda (the lady to whom he addressed "*Ae fond kiss, and then we sever*," and so many other passionate lyrics), and by her given to Charles Kirkpatrick Sharpe, the well-known Edinburgh antiquary and friend of Scott, more than forty years after the poet's death, and only two years before she herself died.

the possible exception of two others by the same author, preserved at Bonn and Munich (*cf.* "The Geographical Journal" for September 1897), it is believed to be the earliest known in which the New World is not only called AMERICA in the text, but in which the geographical representations of that glorious discovery are so named on maps.

The author, Henricus Loritus or Heinrich Loritz, is more generally known to posterity by his popular or adopted name of Glareanus (from Glarus in Switzerland). He has been described as one of the most accomplished men of his time, his studies embracing a wide range of subjects [*cf.* Fritzsche (O. F.) "Glarean, sein Leben und seine Schriften" (*with portrait*), *Frauenfeld*, 1890]. His astronomical and geographical knowledge is amply evidenced by his Treatise, "De Geographia," a work which, first printed at Basle in 1527, became so popular that no less than ten new editions appeared before the year 1550. The present Manuscript is undoubtedly an early draft of this printed Treatise. It contains practically the same text, but there are numerous corrections and marginal insertions in the Manuscript which are embodied in the printed work, while on the other hand there are additions of some length in the printed version, which are not to be found in the Manuscript. Hence it is clear that this Manuscript must be of an earlier date than the actual copy used for the printing in 1527, and internal evidence shows it to be very much earlier. The actual date is somewhat difficult to determine, but by analysis it can, we think, very fairly be placed between the years 1510 and 1513, as we hope to be able to show.

The printed Treatise of Glareanus is in small 4to form, comprising 40 chapters, illustrated by numerous diagrams, *but without any maps*. The Manuscript is in small folio form, neatly written on 45 leaves, and similarly divided into 40 chapters, with numerous diagrams in the text and margins, most of which are found reproduced in the printed volume. But the far greater importance of the Manuscript lies in the beautifully executed series of WORLD MAPS on seven full pages interspersed amongst the text, and which, as stated above, were not reproduced in the printed book.

The Manuscript itself bears no author's name, and has no general title-page, but commences with the heading of Chapter I, "De Gaeometriae principiis," etc. There is, however, absolutely no doubt that it is the actual work of Glareanus, for a comparison of the handwriting with that of the above-mentioned Glareanus Manuscripts preserved at Bonn (which are signed and dated 1510), shows them to be the work of the same hand. A further comparison seems to indicate that the Maps in the present Manuscript are slightly later than those at Bonn and Munich, judged by the fact that they are less crude, more detailed, and more carefully drawn to scale.

LOT 400—*continued*.

The Manuscripts at Bonn and Munich appear to be merely Maps with descriptive text written on the margins, but without any indications of ever having been intended as an actual treatise on geography. From their appearance, one would almost suppose them to be experimental drafts made by Glareanus to improve a method of projection with which he had recently become familiar. In fact, in the marginal notes, he tells us, in effect, that in making them, he has attempted to improve on the old representation of the world as known to Ptolemy, by adding such regions as have since come to knowledge, and in order so to do, he has carried his meridians of longitude right up to the Pole, and by inserting the recent discoveries on the North, South, East, and West, has thus been enabled to complete the whole circle of the Earth. He further states that, in making his maps, he has followed somewhat the "Deodatensian or Vosgean geographer" (*sequutus Geographum Deodatensium seu potius Vosagensem*). This reference to the St. Dié Geographer Waldseemüller is most important at so early a date. The Glareanus Maps at Bonn were discovered by Professor Elter about 1895 in a copy of the "Ulm Ptolemy" of 1482, preserved in the Library of the University, which doubtless formerly belonged to Glareanus himself. The Munich Maps, it is interesting to remember, are similarly added to a copy of the "Cosmographiae Introductio" of 1507, which also formerly belonged to Glareanus.

Professor Elter gives a most interesting account of his discovery of the Bonn maps in an Essay published at Bonn in 1896: "De Henrico Glareano geographo et antiquissima forma 'Americae' commentatio." The facsimiles accompanying the Essay enable the Bonn Maps to be compared with those at Munich, and also with some of those in the present Manuscript. At the time the Bonn Maps were discovered, it must be remembered that the large Waldseemüller Map of 1507 had not yet come to light, but the former enabled us to form some idea of what the St. Dié delineation of the world was likely to be if ever found. When the Waldseemüller Map was discovered in 1901, its geographical configurations were found, as expected, to agree pretty nearly with the Glareanus Maps, though no one was prepared for the enormous size (*c.* 8 ft. by 4 ft. 6 in.) of the "cartographical monster" which Professor Fischer so fortunately unearthed in the Library at Wolfegg Castle.

The series of Maps in the present Manuscript are elegantly drawn and coloured in a thoroughly artistic manner. All the meridians and parallels are accurately placed and numbered, and the shading, tinting and colouring (in many places heightened with gold) are so well done, that the geographical outlines stand out with perfect clearness in prominent relief. The first three, following closely on the rough drafts of Bonn and Munich, may thus certainly be described as direct

LOT 400—*continued.*

derives from the Waldseemüller Map of 1507, with certain improvements in the projection introduced by Glareanus.

The seven pages of Maps are placed in the Manuscript between Chapters XVIII and XXI, which relate to the "Figure and Divisions of the Earth," and may thus be briefly described:

(1) *On the recto of the 22nd leaf.* A Map of the whole world on a single plane, divided at the meridian of  $270^\circ$  on either side, and extending from America on the West to Zipangri on the East. The whole map is cut off at the bottom by the scale-border at  $50^\circ$  S. Latitude. At the top, the curved meridians of longitude of the two centre quadrants, from  $0^\circ$  to  $180^\circ$ , are continued right up to the North Pole, while the rest of the map (a quadrant of  $90^\circ$  on either side) extends only as far north as  $70^\circ$ . Allowing for distortion caused by the improved projection of Glareanus, the main geographical outlines are almost identical with the large single plane map of Waldseemüller of 1507. Both the Northern and Southern Continents of the New World are shown and are not joined together. The latter is clearly marked AMERICA in large letters.

(2 and 3) *On the verso of leaf 24 and recto of 25.* Two hemispheres closely resembling the insets at the top of the large Waldseemüller Map of 1507, but exhibiting similar distortions by the alteration in the projection. The hemispheres being each of the same size as the No. 1 Map, the scale is thus twice as large. The meridians of both hemispheres are all carried right up till they converge at the North Pole, and both are cut off at the bottom by the scale-border at  $50^\circ$  S. Lat. The Eastern hemisphere extends from  $0^\circ$  to  $180^\circ$ , and the Western from  $180^\circ$  to  $360^\circ$ . Both continents of the New World are shown, and the southern one is marked AMERICA in large letters. These maps, although clearly derived from the two insets at the top of the large Waldseemüller Map of 1507, exhibit one most important difference. In the Waldseemüller insets the two American continents are shown joined by a narrow isthmus, but here they are shown divided by a space of about  $5^\circ$  of sea.

(4 and 5) *On the verso of leaf 25 and recto of 26.* A close copy, somewhat reduced, of the famous map of John Ruysch, on a fan-shaped projection, which first appeared in the "Rome Ptolemy" of 1508. This map is of great interest, as showing that Glareanus was not content to derive his information from one source alone, but kept himself conversant with all the best maps of the period. This fact, as we hope to show later, has a distinct bearing on our hypothesis that this Manuscript cannot be later than 1513. In this map the southern continent of the

LOT 400—*continued.*

New World does not bear the name America, but is marked "Terra Sanctae Crucis sive novus mundus" exactly as in the Ruysch Map.

- (6 and 7) *On the verso of leaf 26 and recto of 27.* Two circular hemispheres drawn on an equidistant polar projection, believed to be the invention of Glareanus himself. At all events they are (with the similar ones at Bonn) the earliest Maps known on which the figure of the Earth is projected in two circular hemispheres divided at the Equator, with the Poles as centres. The formula (with diagram) for drawing this projection is written underneath each hemisphere. It is believed that the earliest hitherto known instance in which this projection is used, is on the printed map which occurs in the new and important edition of Ptolemy in Italian, printed at Venice in 1561, edited by Girolamo Ruscelli. The present hemispheres show some advance on the similar ones preserved at Bonn. In the case of the Bonn drafts, the southern hemisphere is drawn on a scale only half the size of the northern one, and the projection, not being thoroughly understood, the outlines are "backwardized" or reversed, as explained by Glareanus himself in a marginal note (*retrogradum faciamus necessum habemus*). Here the two hemispheres are of equal size and correct outline. The two continents of the new world are not joined, and the southern one (which is cut through by the Equator) is shown partly in each hemisphere, both parts being marked AMERICA.

We have thus, in these seven pages of Maps, five separate representations of the New World, four of which are actually named AMERICA. It is obvious that they are slightly later than the Bonn drafts of 1510, but we have no hesitation in fixing the date as prior to 1513, because we fail to find any influence, either of the new maps which appeared in the Supplement to the 1513 Ptolemy, or of the second large Waldseemüller Map of 1516. The use made by Glareanus of the Waldseemüller Map of 1507, and the Ruysch Map of 1508, shows him to have been thoroughly conversant with the best maps of his time. His notes on the margins of his maps, preserved in the 1482 Ptolemy at Bonn, show him to have been a great student of Ptolemy; hence it is idle to suppose he would not immediately have become acquainted with the new Strasburg Edition of 1513, and been influenced by it, had the present maps been made after 1513. The same arguments would apply even more forcibly to the second large Waldseemüller Map of 1516.

The Manuscripts occur for sale through the recent decease of the late owner, Major-General E. Renouard James, R.E. He inherited them, by bequest, from his great-uncle, the Rev. George Renouard, whose mother was Mary Ott, a member

Lot 400—*continued*.

of the important Swiss family of that name, settled at Zurich as far back as the 14th century. The collection of documents, of which these Glareanus MSS. formed part, was made by an earlier member of the same family, and has never since passed out of the hands of his descendants. For the purposes of sale, the Glareanus MSS. have now been separated from the other papers, of an entirely different nature (mostly theological), which were formerly bound up with them in the same volume [see lot 399]. The Glareanus Manuscripts have been re-cased in the old half vellum cover.

Several more-technical accounts of the first Manuscript have been published, to which reference may be made, viz. "The Geographical Journal" for June 1905, and "The Royal Engineers' Journal" for June 1905 and September 1908. The two former contain a coloured facsimile of the Northern circum-polar hemisphere, while in the last will be found uncoloured diagrams, on a small scale, of the whole seven maps. The second Manuscript, "De Asse Compendium," relates to Roman weights, measures, coins, etc.
